

## Celsion Corporation Announces Stock Consolidation

February 28, 2022

**LAWRENCEVILLE, N.J., Feb. 28, 2022 (GLOBE NEWSWIRE)** -- Celsion Corporation (NASDAQ: CLSN), a clinical-stage company focused on DNA-based immunotherapy and next-generation vaccines, today announced that, as previously authorized by its shareholders, the Company is implementing a consolidation (reverse stock split) of its outstanding Common Shares on the basis of one (1) new Common Share for every fifteen (15) currently outstanding Common Shares.

The new Common Shares will be effective for trading purposes as of the commencement of trading on Tuesday, March 1, 2022, and will trade under a new CUSIP number 15117N 602. The Company's ticker symbol, CLSN, will remain unchanged. The Company has filed a Certificate of Amendment to its Certificate of Incorporation to effect the stock consolidation.

The new number of outstanding common shares will be approximately 5.8 million shares. The number of authorized shares and the par value per share will remain unchanged. No fractional shares will be issued in connection with the reverse stock split. Holders of fractional shares will be paid out in cash for the fractional portion. The number of outstanding options and warrants will be adjusted accordingly, with outstanding options being approximately 437,500 and outstanding warrants being approximately 168,500.

Celsion stockholders will receive instructions from the Company's transfer agent, American Stock Transfer and Trust Company, relating to procedures for exchanging existing stock certificates for new certificates or book-entry shares and for the receipt of cash proceeds in lieu of fractional shares.

### About Celsion Corporation

Celsion is a fully integrated, clinical stage biotechnology company focused on advancing a portfolio of innovative cancer treatments, including immunotherapies and DNA-based therapies; and a platform for the development of nucleic acid vaccines currently focused on SARS-CoV2. The company's product pipeline includes GEN-1, a DNA-based immunotherapy for the localized treatment of ovarian cancer. Celsion also has two platform technologies for the development of novel nucleic acid-based immunotherapies and other anti-cancer DNA or RNA therapies. Both are novel synthetic, non-viral vectors with demonstrated capability in nucleic acid cellular transfection. Celsion's wholly owned subsidiary, Celsion GmbH, is managing ThermoDox<sup>®</sup>, a proprietary heat-activated liposomal encapsulation of doxorubicin, which is under investigator-sponsored development for several cancer indications.
