

## Imunon Reports Inducement Grants under NASDAQ Listing Rule 5646(c)(4)

March 21, 2023

**LAWRENCEVILLE, N.J., March 21, 2023 (GLOBE NEWSWIRE) -- Imunon, Inc. (NASDAQ: IMNN)**, a clinical-stage drug development company focused on DNA-based immunotherapy and next-generation vaccines, today announced that the Compensation Committee of the Company's Board of Directors approved the grant of (i) inducement stock options (the "Inducement Option Grants") to purchase a total of 5,250 shares of common stock and (ii) restricted stock grants (the "Inducement Stock Grants") totaling 1,100 shares of common stock as a material inducement to the employment of two individuals hired by Imunon during the first quarter of 2023. The equity awards were approved in accordance with Nasdaq Listing Rule 5635(c)(4).

The Inducement Option Grants have an exercise price per share equal to \$1.32, which is equal to the closing price of Imunon's common stock as reported by Nasdaq on March 17, 2023. The Inducement Option Grants vest in quarters over four years with the vesting starting on the one-year anniversary of each employee's first day of employment with the Company and thereafter vest in three additional installments so all Inducement Option Grants will be fully vested and exercisable as of March 17, 2027, subject to each employee's continued service relationship with the Company on each such date. Each Inducement Option Grant has a ten-year term.

Each of the Inducement Stock Grants will vest on the one-year anniversary of each employee's first date of employment with the Company and are subject to each such employee's continued service relationship with the Company on such vesting date.

### About IMUNON

IMUNON is a fully integrated, clinical stage biotechnology company focused on advancing a portfolio of innovative treatments that harness the body's natural mechanisms to generate safe, effective and durable responses across a broad array of human diseases, constituting a differentiating approach from conventional therapies.

IMUNON has two platform technologies: the TheraPlas modality for the development of immunotherapies and other anti-cancer nucleic acid-based therapies, and the PLACCINE modality for the development of nucleic acid vaccines for infectious diseases and cancer. The company's lead clinical program, IMNN-001, is a DNA-based immunotherapy for the localized treatment of advanced ovarian cancer currently in Phase 2 development. IMNN-001 works by instructing the body to produce safe and durable levels of powerful cancer-fighting molecules, such as interleukin-12 and interferon gamma, at the tumor site. Additionally, the company is conducting preclinical proof-of-concept studies on a nucleic acid vaccine candidate targeting the SARS-CoV-2 virus to validate its PLACCINE platform. IMUNON's platform technologies are based on the delivery of nucleic acids with novel synthetic delivery systems that are independent of viral vectors or devices. IMUNON will continue to leverage these platforms and to advance the technological frontier of nucleic acid-based products to better serve patients with difficult-to-treat conditions.
